

The
**ULTIMATE
MATTING**
Solution

The Ergo Advantage

1. Safety

- The Anti-Slip Grit surface helps reduce slips, trips, and falls
- ESD tile protects employees from static shocks
- 6" colored tiles enhance 5S & 6S programs
- Clear tiles allow for under mat lighting
- The underside leg structure provides clearance for cords and hoses

2. Modularity

- All tiles interlock and allow for easy installation and configuration
- Tiles can be staggered
- Tile types bring functionality for different environments

3. Ergonomics

Innovative Compression Flex Technology is designed to provide:

- Even weight distribution to reduce joint stress
- Less fatigue throughout the day
- Shock absorption to lower strain
- Increased blood flow

4. Durability & Warranty

- PVC injection molding process produces an unsurpassed durability in all manufacturing environments
- Under normal conditions our tiles have the industry's longest projected life
- Savings are realized by not losing production time via outages
- The best warranty on the market

5. Environmental Excellence

- Manufactured with recycled PVC for waste reduction

- Using recycled matting contributes to sustainability
- Lifetime recycling offer

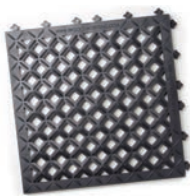

Matting Solutions for all Work Environments

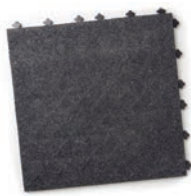

Anti-Fatigue Tile Anti-Fatigue Drainage Tile Grit Tile Drainage Grit Tile Antimicrobial Smooth Top Tile ESD Tile

Part# A1
Top rated Anti-Fatigue tile for dry areas such as assembly lines, inspection stations, and machining areas. This tile provides excellent support and is very easy to clean.

Part# A2
Top rated Anti-Fatigue drainage tile designed for areas where non oil based liquids need to drain through while operators footing remains dry. Chips and/or air flow are also pass through the surface.

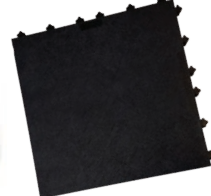

Part# AG1
The silicon carbide surface provides maximum slip resistance. Ideal for all types of manufacturing environments where lubricants are present.

Part# AG2
Ideal for any area where excessive amounts of oil based fluids need to flow into drains or pits. The design allows users to work safely on the grit surface while oils pool underneath the tile.

Part# AM2
Ideal for any area where there is a need for additional cleanliness and resistance to mold and bacteria.

Part# A1SM
Smooth top tiles are designed for light cart traffic and easy cleaning.

Part# ESDA1
Formulated to slowly discharge static build-up and protect workers from static shocks.
