Where Safety Solutions Happen

## Sustainability:

Our tiles are made of recycled PVC to reduce the environmental impact

**2.1 million  
pounds of PVC  
diverted from  
landfills annually**

ErgoZone workstation kits are pre-packaged to make it easy for you to order. No measuring or calculations necessary. They come complete with all edges necessary and easy to follow instructions for assembly. These convenient ErgoZones deliver:

**Health Benefits:** Designed by a team of engineers and kinesiologists to deliver the top anti-fatigue floor available.

- Even weight distribution reduces joint stress
- Textured domes increase bloodflow and limit fatigue

**Safety Improvements:** Significantly decrease the chance of slips, trips and falls.

- Mat structure provides clearance for cords and hoses
- Bevelled edges won't curl and allow for safe traffic
- Fire and spark resistant
- ESD, Gritted and Antimicrobial options

**Top Durability:** Our tiles are made to last with industrial strength injection molded formulation

Place mats in front of workstations or machinery to increase health and safety of employees. Choose the type and size based on that zone's needs. Can be easily moved for cleaning or workstation changes.

Custom solutions also available for larger surface areas.

Zone 1	Zone 2	Zone 3
<p>44in 44in 13.5 ft<sup>2</sup></p>	<p>44in 62in 19 ft<sup>2</sup></p>	<p>44in 98in 30 ft<sup>2</sup></p>
4 Tiles + 8 Edges	6 Tiles + 10 Edges	10 Tiles + 14 Edges

Zones can be made up of groups of the following Tile Types:

	Tile Type	Description	Sizes Available
Dry Areas		<b>Anti-Fatigue Tile</b> – Top rated anti-fatigue tile made with compression flex technology, Class 1 fire resistant, made from 100% Recycled PVC – our best seller!	Zone 1 (A1BZ1) Zone 2 (A1BZ2) Zone 3 (A1BZ3)
		<b>ESD Tile</b> – Provides Electrostatic discharge capabilities to protect equipment and workers as well as excellent anti-fatigue. ESD additive is embedded throughout the entire mat.	Zone 2 (ESDA1Z2) Zone 3 (ESDA1Z3)
Wet Areas		<b>Anti-Fatigue Drainage Tile</b> – Domed to provide anti-fatigue rating, holes for drainage of non-oil based liquids, debris or air flow, class 1 fire resistant, made from 100% recycled PVC.	Zone 2 (A2BZ2) Zone 3 (A2BZ3)
		<b>Antimicrobial Tile</b> - Formulated with Ultra Fresh Technology to resist the growth of mold and mildew. Antimicrobial additive is embedded throughout entire mat. Excellent anti-fatigue support.	Zone 2 (AM2Z2) Zone 3 (AM2Z3)
Oily Areas		<b>Gritted Drainage Tile</b> – Most aggressive grit on the market made of silicone carbide provides excellent anti-slip with holes for drainage of oils and lubricants, class 1 fire resistant, good anti-fatigue support.	Zone 2 (AG2BZ2)
		<b>Gritted Tile</b> - Most aggressive grit on the market made of silicone carbide provides excellent anti-slip properties from oils and lubricants, class 1 fire resistant, good anti-fatigue support.	Zone 2 (AG1BZ2)
Edges		<b>Edges and Corners</b> - All zones come with yellow bevelled edges to ensure safe on/off traffic.	All (A3, A4, A5, A6)
