

THERE'S SAFETY IN NUMBERS

64

is the # of support legs on the bottom of our mats. Designed to promote muscle movement while stabilizing the surface, and built for safe cord management underneath

12

is the number of connection lugs on each one of our mats, 6 on each of two sides. A patented design for a safer, stronger and simpler interlocking matting system

49

is the # of compression domes on top of our mats. This patented technology disperses body weight across a larger surface, preventing the legs from remaining static

2

MILLION LBS

is how much scrap PVC we divert from Canadian and US landfill sites every year to deliver the most resilient, most responsive and longest lasting anti-fatigue safety matting solution on the planet

.....
This is not another 'me-too' product. Only Ergo Advantage is scientifically designed to support posture while creating proven safer workspaces. Nothing else comes close.
